## **Fundtech extends its NT offerings**

October 1999

Electronic payment and cash management specialist Fundtech launched its Internet enabled e-payments solutions for Windows NT and Unix platforms at Sibos '99. The company also introduced PAYplus CLS and NOSTROplus as well as enhanced versions of its existing solutions. Fundtech's systems are all multicurrency, multilingual, Web enabled and operate in real time.

Global CASHstar is an internet-based corporate cash and treasury management solution that manages multiple bank relationships and global cash positions in real time and allows corporations to integrate internal workflows with payment activity throughout the organization.

ACCESS.pro is an electronic banking solution supporting a complete set of cash management services through a full range of delivery channels including the Internet. PAYplus CLS is an interoperable forex payment and settlement service designed for CLS Bank settlement members, user members and third parties. NOSTROplus is a nostrum management solution to help manage multiple correspondent bank account positions worldwide in real time.

The company will be showcasing an enhanced version of its PAYplus RTGS an integrated multicurrency payments system that automates real time gross settlement, Swift messaging and liquidity management. The latest version includes a new generation graphical user interface.

Reuven Ben-Menachem, Fundtech's chairman and CEO says the company, which has this year opened additional offices in London, Sydney and Zurich, now has a client base of more than 300 banks worldwide. It has also recently acquired Swiss electronic payments specialists, Biveroni Batschelet Partners, with whom it hopes to increase its market share of the European payment sector.
