## SWIFT FileAct IGTplus

### **Solution**

There is a growing need of the financial industry to exchange files in a secure and reliable way. SWIFT has answered to this need with its service SWIFTNet FileAct. The use of FileAct might be based on a bilateral or intra-institution level.

At the same time more and more market infrastructures in the payment area (TARGET 2, SEPA, EBA Step2, etc) as well as in the securities industry (Euroclear, Clearstream, etc.) are moving into the same direction and implement FileAct.

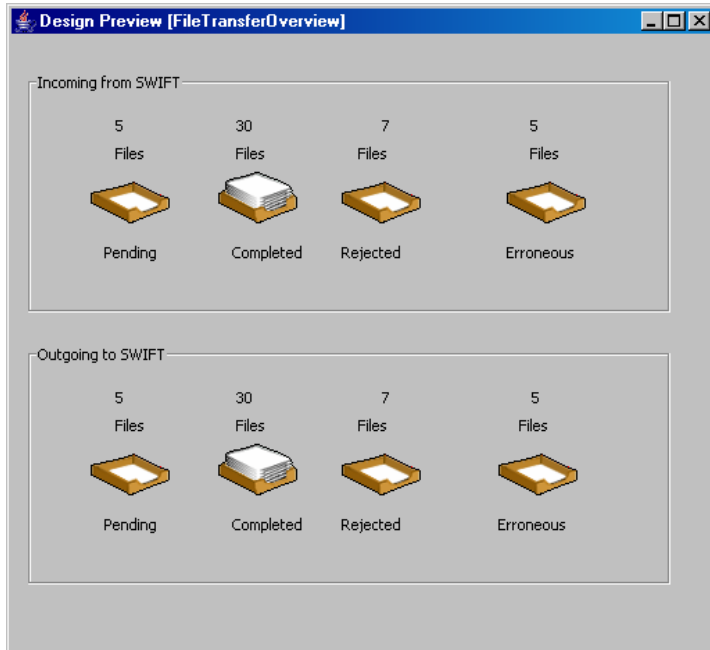

SWIFT FileAct IGTplus enables Financial Institutions and Corporates to take full advantage of FileAct.

It is a store-and-forward gateway supporting the sending and receiving of files in a full STP mode. A comprehensive GUI allows monitoring of the file exchange as well as investigations. Routing, scheduling, duplicate control and archiving is all supported.

The application is based on the IGTplus infrastructure, which is described in IGTplus Product Overview. This document only deals with the SWIFT FileAct specific functions in detail.

### File flow Monitoring

SWIFT FileAct IGTplus delivers a real time overview on all files with their current status on a single screen:

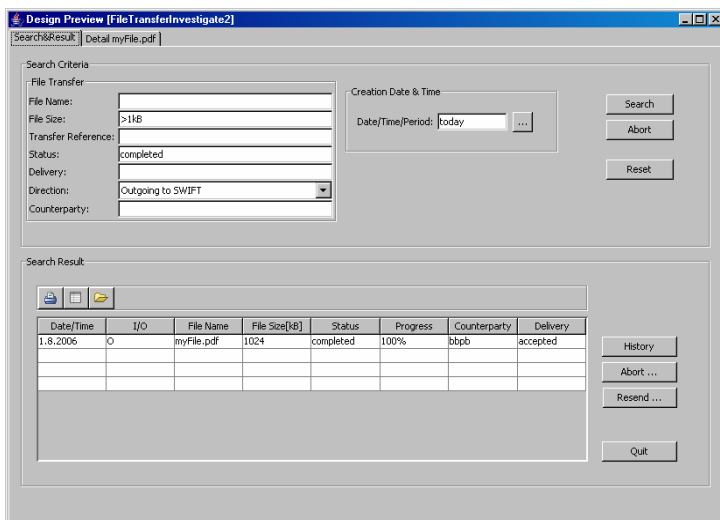

### Comprehensive Search Functionality

Incoming and outgoing files can be searched on file level by many different criterias. Among others:

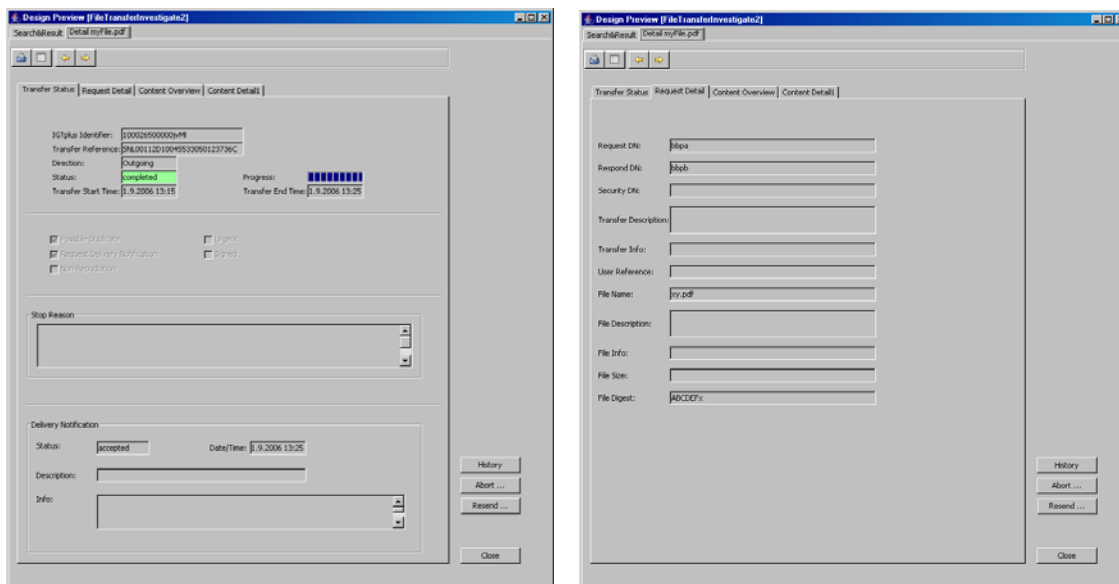

Name, sender, receiver, size (compressed and decompressed), compression algorithm, status, timestamps, Number of Messages, etc.

The search results cannot only be viewed online, they also can be printed or exported into txt-files.

## Detail Views

SWIFT FileAct IGTplus offers drill down functionality to view file details:

## Main Functionality

### FileAct

- Full support of all FileAct modes:
  - Real-time
  - Store-and-forward in push and pull mode
- Guaranteed file delivery (by store and forward mechanism in IGTplus)
- Duplicate control

### User Interface

- GUI for FileAct monitoring, search, detailed views
- Extensive user right management

### Integration

- Full integration with SAG using RAHA
- Full integration with other IGTplus products
- Full middleware functionality
- Integration to any application

### **Main Benefits**

With SWIFT FileAct IGTplus your institution profits of the following main benefits:

- Complete FileAct functionality
- Fully scalable
- SWIFT FileAct IGTplus seamlessly integrates with the IGTplus product family

IGTplus product family offers additional SWIFT modules for FIN, InterAct, as well as full messaging middleware functionality with main features like bulking, debulking of files and comprehensive integration and conversion possibilities.

### **SWIFT FileAct IGTplus Scope of Supply**

- The name SWIFT FileAct IGTplus describes the software package, which includes the following modules:
- SWIFT FileAct: File processing for SWIFT FileAct as described above.
- Control: SWIFT based configuration, control and monitoring message flow including communication with
- SWIFTNet FIN via SAG (SWIFTAlliance Gateway) and communication with other internal or external applications (hosts).
- Admin: User administration
- Master Data: SWIFT master data administration (BIC, currency codes).
- Audit: Auditing of all processes in the system.

SWIFT FileAct IGTplus is available as a Software Solution as well as a Service:

- As Software solution the customer runs the software in-house. BBP offers the Software license together with the corresponding implementation services and training.
- In the Service Bureau BBP operates the software on behalf of its clients as an ASP (Application Software Provider) in its own computer center. BBP offers together with the fully managed service the implementation and training services.
