

Sell Side Configuration

Manage all of your Post Trade Processing from a Single, highly Effective & Secure, Web Interface

TRADEplus™ offers Broker Dealers and Correspondent Clearing Firms a competitive edge with a technology that supports high volume processing through superior internet capabilities, automated trade operations and advanced STP.

Providing real-time connectivity with Omgeo, SunGard, FIX, SWIFT and other leading market applications and standards, TRADEplus™ automates internal and external matching, manages exceptions, enriches trade records, and intelligently routes by business area.

Deploying TRADEplus™ removes time consuming manual processes from trade operations, and significantly increases real-time visibility and control, while driving down costs and execution risk.
